Completed	Monday, 19 October 2026, 8:14 PM
Duration	3 mins 48 secs
Grade	**13.00** out of 15.00 (**86.67**%)

Question **1**
Correct
Mark 1.00 out of 1.00
Flag question

What is the first step in binary search?

○ a. Divide the list into two equal parts
● b. Compare the target element with the middle element in the list ✓
○ c. Sort the list
○ d. Compare the target element with the first element in the list

Question **2**
Correct
Mark 1.00 out of 1.00
Flag question

What happens when the element is found in linear search?

● a. The search stops immediately ✓
○ b. The search continues until the end of the list
○ c. The search backtracks to find duplicate elements
○ d. The search starts over from the beginning

Question **3**
Incorrect
Mark 0.00 out of 1.00
Flag question

What type of search would be most appropriate for finding an element in a list that is frequently updated?

○ a. Interpolation search
○ b. Linear search
● c. Hash search ✗
○ d. Binary search

Question **4**
Correct
Mark 1.00 out of 1.00
Flag question

In binary search, what happens if the middle element does not match the target element?

○ a. The search stops
○ b. The list is sorted
● c. The search continues in the left or right sublist ✓
○ d. The search continues from the beginning

Question **5**
Correct
Mark 1.00 out of 1.00
Flag question

Which method of searching involves sequentially comparing each element until a match is found?

○ a. Jump search
○ b. Hashing
○ c. Binary search
● d. Linear search ✓

Question **6**
Correct
Mark 1.00 out of 1.00
Flag question

Which of the following is not a limitation of binary search algorithm?

● a. Binary search algorithm is not efficient when the data elements more than 1500 ✓
○ b. There must be a mechanism to access middle element directly
○ c. Requirement of sorted array is expensive when a lot of insertion and deletions are needed
○ d. Must use a sorted array

Question **7**
Correct
Mark 1.00 out of 1.00
Flag question

Which of the following is a conventional searching technique?

● a. Linear search ✓
○ b. Binary search
○ c. Dynamic search
○ d. Hashing

Question **8**
Correct
Mark 1.00 out of 1.00
Flag question

What is the advantage of binary search over linear search?

○ a. Binary search does not require dividing the list
● b. Binary search has a lower time complexity on large, sorted lists ✓
○ c. Binary search can find multiple instances of the target element
○ d. Binary search works on unsorted lists

Question **9**
Correct
Mark 1.00 out of 1.00
Flag question

What is the best-case time complexity of linear search?

○ a. O(log n)
○ b. O(n log n)
○ c. O👎
● d. O(1) ✓

Question **10**
Correct
Mark 1.00 out of 1.00
Flag question

Which of the following best describes the process of a linear search?

○ a. Sorting the list before searching
● b. Checking each element sequentially ✓
○ c. Dividing the list in half repeatedly
○ d. Skipping every second element

Question **11**
Correct
Mark 1.00 out of 1.00
Flag question

The average case occurs in the linear search algorithm

○ a. When the item is the last element in the array
● b. When the item is somewhere in the middle of the array ✓
○ c. Item is the last element in the array or item is not there at all
○ d. When the item is not the array at all

Question **12**
Incorrect
Mark 0.00 out of 1.00
Flag question

What happens in a binary search if the list has an even number of elements?

○ a. The higher middle element is chosen as the middle element
○ b. The search stops
○ c. The middle element is chosen randomly
● d. The lower middle element is chosen as the middle element ✗

Question **13**
Correct
Mark 1.00 out of 1.00
Flag question

In __________ checks the elements of a list, one at a time, without skipping any element.

○ a. Both (1) & (3)
○ b. Binary search
● c. Linear search ✓
○ d. Hash search

Question **14**
Correct
Mark 1.00 out of 1.00
Flag question

In which situation is linear search more efficient than binary search?

○ a. When the list is large and sorted
● b. When the list is small and unsorted ✓
○ c. When the list is large and unsorted
○ d. When the list is small and sorted

Question **15**
Correct
Mark 1.00 out of 1.00
Flag question

Which of the following is a limitation of binary search?

○ a. It is slower than linear search for small lists
● b. It requires the list to be sorted ✓
○ c. It can only be applied to large lists
○ d. It does not work with negative numbers
