Completed	Monday, 19 October 2026, 8:18 PM
Duration	2 mins 52 secs
Grade	**14.00** out of 15.00 (**93.33**%)

Question **1**
Complete
Mark 1.00 out of 1.00
Flag question

Which sorting algorithm involves comparing elements and swapping adjacent items that are out of order?

○ a. Linear Search
● b. Bubble Sort
○ c. Merge Sort
○ d. Binary Search

The correct answer is: Bubble Sort

Question **2**
Complete
Mark 1.00 out of 1.00
Flag question

Two-way merge sort algorithm is used to sort the following elements in ascending order.
200,470,150,80,90,40,400,300,120,70
What is the order of these elements after second pass of the merge sort algorithm?

● a. 80,150,200,470,40,90,300,400,70,120
○ b. 40,80,90,150,200,300,400,470,70,120
○ c. 200,470,80,150,40,90,300,400,70,120
○ d. 40,70,80,90,120,150,200,300,400,470

The correct answer is:
80,150,200,470,40,90,300,400,70,120

Question **3**
Complete
Mark 1.00 out of 1.00
Flag question

__________ explain how an algorithm will perform when the input grows larger.

○ a. Merging
○ b. Searching
● c. Complexity
○ d. Sorting

The correct answer is:
Complexity

Question **4**
Complete
Mark 1.00 out of 1.00
Flag question

Which built-in Python function is used to sort data?

○ a. sort()
○ b. order()
○ c. arrange()
● d. sorted()

The correct answer is: sorted()

Question **5**
Complete
Mark 1.00 out of 1.00
Flag question

What is a significant characteristic of Bubble Sort?

○ a. It uses the heap data structure
● b. It bubbles up the largest element in each pass
○ c. It recursively sorts subproblems
○ d. It divides the list into sublists

The correct answer is: It bubbles up the largest element in each pass

Question **6**
Complete
Mark 1.00 out of 1.00
Flag question

How does Merge Sort achieve its efficiency?

○ a. By using the bubble-up method
○ b. By comparing elements sequentially
○ c. By sorting data in a single pass
● d. By breaking the input into smaller parts and merging them

The correct answer is: By breaking the input into smaller parts and merging them

Question **7**
Complete
Mark 1.00 out of 1.00
Flag question

Which sorting algorithm would be preferred for its divide-and-conquer approach?

○ a. Linear Search
● b. Merge Sort
○ c. Binary Search
○ d. Bubble Sort

The correct answer is: Merge Sort

Question **8**
Complete
Mark 1.00 out of 1.00
Flag question

Which of the following is a key reason for the importance of sorting algorithms?

○ a. Sorting is rarely used in programming
○ b. Sorting decreases the efficiency of selection operations
○ c. Sorting makes it harder to search for items
● d. Sorting helps in finding duplicates quickly

The correct answer is: Sorting helps in finding duplicates quickly

Question **9**
Complete
Mark 1.00 out of 1.00
Flag question

Why is sorting important for selection operations?

● a. It makes it easier to select items based on their relationship to the rest of the items
○ b. It slows down the process
○ c. It complicates the selection of items
○ d. It makes the data unsorted

The correct answer is: It makes it easier to select items based on their relationship to the rest of the items

Question **10**
Complete
Mark 1.00 out of 1.00
Flag question

What is sorting in the context of computer science?

○ a. Deleting data from a list
● b. Arranging data in a particular format
○ c. Searching for data in a list
○ d. Inserting data into a list

The correct answer is: Arranging data in a particular format

Question **11**
Complete
Mark 1.00 out of 1.00
Flag question

Which algorithm typically follows a divide-and-conquer structure?

○ a. Linear Search
○ b. Binary Search
○ c. Bubble Sort
● d. Merge Sort

The correct answer is: Merge Sort

Question **12**
Complete
Mark 0.00 out of 1.00
Flag question

Very slow way of sorting is________

○ a. Insertion sort
● b. Bubble sort
○ c. Heap sort
○ d. Quick sort

The correct answer is:
Insertion sort

Question **13**
Complete
Mark 1.00 out of 1.00
Flag question

Which sorting algorithm is known for its simplicity and sequential comparison of elements?

○ a. Merge Sort
○ b. Heap Sort
● c. Bubble Sort
○ d. Quick Sort

The correct answer is: Bubble Sort

Question **14**
Complete
Mark 1.00 out of 1.00
Flag question

What is a characteristic of the merge sort algorithm?

○ a. It is less efficient than bubble sort
● b. It is based on the divide-and-conquer approach
○ c. It sorts data using a single pass
○ d. It does not require recursion

The correct answer is: It is based on the divide-and-conquer approach

Question **15**
Complete
Mark 1.00 out of 1.00
Flag question

In Merge Sort, what happens after dividing the input into smaller parts?

● a. Each part is sorted independently
○ b. The parts are ignored
○ c. The parts are merged without sorting
○ d. Each part is searched for a specific element

The correct answer is: Each part is sorted independently
